Band and Orchestral Division*

Instrument Care Reminders

Before putting your instrument back in its case after playing, do the following:

- Use the water key to empty water from the instrument. Blow air through it.
- Remove the mouthpiece and slide assembly. Do not take the outer slide off the inner slide piece. Return the instrument to its case.
- Once a week, wash the mouthpiece with warm tap water. Dry thoroughly.

Trombone slides occasionally need oiling. To oil your slide, simply:

- Rest the tip of the slide on the floor and unlock the slide.
- Exposing the inner slide, put a few drops of oil on the inner slide.
- Rapidly move the slide back and forth. The oil will then lubricate the slide.
- Be sure to grease the tuning slide regularly. Your director will recommend special slide oil and grease, and will help you apply them when necessary.

CAUTION: If a slide or your mouthpiece becomes stuck, ask for help from your band director or music dealer. Special tools should be used to prevent damage to your instrument.
